📍 Cologne, Germany   🚩 Indian

MBA Student in International Management with 4+ years of professional experience in business-technical coordination, quality engineering, and data validation within complex, data driven systems. Strong background in requirements analysis, API and database validation, and cross functional collaboration. Currently studying at CBS International Business School, Cologne, with an academic focus on business intelligence, project management, and quantitative research methods, including survey and questionnaire design. Known for a structured working style, hands on execution, and delivering reliable results in high pressure environments alongside academic commitments.

💼 PROFESSIONAL EXPERIENCE

Quality Engineering Analyst / Business-Technical Liaison, *Accenture Solutions Pvt. Ltd.*   11/2022 – 08/2025
Bengaluru, India
- Acted as a bridge between business stakeholders and technical teams, translating compliance and reporting requirements into clear technical specifications.
- Performed hands-on API testing (Postman, Bruno) and SQL-based database validation to ensure data accuracy and system reliability.
- Supported end-to-end execution from requirement clarification through validation of final outputs.
- Defined and validated mandatory fields and parameters required for system execution and reporting.
- Identified, analyzed, and clearly communicated data inconsistencies and logic issues impacting downstream reporting.
- Collaborated with international Agile teams across Germany, UK, Spain, and China.
- Supported applications operating under high-pressure conditions with limited tolerance for errors.

Application Development Associate, *Accenture Solutions Pvt. Ltd.*   11/2020 – 11/2022
Bengaluru, India
- Supported quality assurance for a web-based sustainability and compliance platform.
- Conducted regression testing for mobile and web applications, improving system stability and performance.
- Logged and tracked defects using Azure DevOps, supporting efficient issue resolution.
- Collaborated with developers and analysts to validate functional requirements.
- Supported confirmation and validation of Power BI reporting outputs by cross-checking data accuracy with source systems.
- Contributed to test documentation, process flows, and functional specifications.
